**ORDER FOR POST MORTEM EXAMINATION AND TOXICOLOGY**

Pursuant to Tennessee Code Annotated §38-7-106, and the laws of the State of Tennessee, the undersigned Roane County Medical Examiner hereby ORDERS a post mortem external examination with toxicology (NO autopsy) on the body of MISTY SCHUBERT--dob 07/06/1980, SSAN 421-15-6151, RME CASE 17118.

**BRIEF HISTORY:**

Decedent lived with her husband Jack Schubert at 164 Evans Heights, Rockwood, TN 37854. They went to bed shortly after midnight on April 16, 2017. He woke up around 0510 and found her unresponsive. He called 911 @ 0514. First responders arrived on scene @ 0521 and Medics @ 0527. CPR was initiated by husband then by EMS personnel. She was given epinephrine x 1 and received 3 defibrillator shocks as well as Narcan.

CPR was terminated @ 0544; I received a phone call asking me to come to the scene. While on the phone EMS advised that a faint pulse had been found. CPR was resumed; she was transported to Roane Medical Center arriving @ 0603. I arrived @ Roane Medical Center @ 0735 and obtained 2 gray top TBI toxicology kit tubes @ 0807 as an IV line was being started in her right forearm. I also requested that Roane Medical Center lab (865-316-2900) put a hold on any blood and urine.

Decedent was transferred to Ft. Sanders Regional Medical Center. She was maintained continuously on a ventilator. After she failed to show any improvement, the family decided to terminate life support on the morning of April 27. She was extubated and provided with comfort measures until she expired at 0845 on May 1, 2017.

Decedent's husband stated that she had been buying Suboxone off the street. UDS at Roane Medical Center tested positive for Benzodiazepines and Amphetamines. CSMD shows no history.

The investigating detective is Dwane Gray 865-323-7285. I will deliver the blood and urine obtained at Roane Medical Center to your facility later today.
